

Appendix 15

List Thesis from Doctor's Program in Biotechnology

No	Year	Title	Full Name
1.	2022	Modification of Porous Carbon Material from Water Hyacinth for Applications of High Capacity Lithium Sulfur Battery Composites	Otong Nurhilal
2.	2022	Model Development of Super Intensive Fry Striped Catfish Culture With The Application of Ultrafine Bubbles in Resirculating Aquaculture System	Ujang Subhan
3.	2021	Development of Bone Substitute Materials Based on Carbonate Apatite using Simple Solution and Fine Bubble Carbonation Method	Renny Febrida
4.	2022	Antioxidant Activity of The Red Ginger - Bread and its Effect on The Lipid Profile and Blood Pressure of Healthy Volunteers	Titin Sulastri
5.	2021	The Effects of Shearing and Ascorbyl Palmitate Supplementation on Physiological, Hematological, Blood Biochemistry, Oxidative Stress and HSP70 Level of Padjadjaran Sheep	Ahmad Taofik
6.	2021	Development of SARS-CoV-2 Antigen Detection Kit Based on Immunoglobulin Y (IgY) using Surface Plasmon Resonance (SPR)	Thyazen Alhakimi
